Seed Grain Fair is

A Successful Event

The following is a list of the successful competitors at the Seed Grain Fair, held at Bindloss on November 12 and 13, received from Mr. H. G. Moore, Secretary.
Wheat--E. Lorentzen, Barnes Bros., J. Barnes, J. W. Hutchison, G. G. Jarvis.
Oats--One exhibit only, J. W. Hutchison, awarded 2nd prize.
Barley--One exhibit only, J. W. Hutchison, awarded 2nd prize.

Rye--H. Demarest, P. Brown, J. D. Rogers, G. Jarvis.
Flax--E. Lorentzen, J. Muz, Potatoes--M. F. Gordon, Grass Seed--H. G. Moore, Broaded Potatoes--P. Brown and J. D. Rogers.
Corn--W. J. Hutchison.
Good support and large attendances were given this Annual Seed Grain Fair, and it is hoped by the Directors to have even a better and larger program in 1930.

The Christmas Tree Business

The Christmas tree business grows annually. Last year approximately seven million trees were used in North America, about a fifth of which were used in Canada and this year the business promises to be larger than ever. Buyers from the United States have been busy in Canada since early September and from New Brunswick alone about half a million trees will cross the border to bring Canada's Christmas cheer to as many of our neighbor's homes. The methods of handling Christmas trees varies. Some buyers arrange to have trees cut by the farmers or by men whom they may employ. Contracts are made for the trees either on a stumpage basis per piece or bunch or by purchase of an area supporting Christmas tree stock outright, after being cut by the buyer.

There is no reason whatever why every family should not have a Christmas tree to gladden the hearts of the little ones. For those who would be more conservative, the practice of using a live tree is recommended. After the festival season the tree can adorn the garden and may if desired be used for several successive seasons.

An Enjoyable Entertainment

The Richard Kent Stock Co. appeared at the local theatre on Monday in the presentation, "A Hot Little Foreign Girl." The pleasing manner in which this attraction was presented was enjoyed by the audience to the full and was undoubtedly one of the best entertainments that has been offered the local public, and was favorably commented on by all who attended. The violin playing of Frank McLevey was a feature of the evening and a delight to the audience.

Progress At Fuego Well

A letter from Mr. A. O. McArthur, manager of the Fuego Oil Co., late last week, apprised us of the progress at the well. Since completing their cement operations they have cleaned out the hole and on last Wednesday expected to reach the old depth previous to cementing. Heavy gas pressure has created difficulty by loosening stones and boulders at the bottom of the hole, some of which have fallen on top of the bit. One stone weighing close to 6 lbs. was blown clear out of the hole.

Weather Has Been Mild Snowfall Is Heavy

Weather during this past week has been very mild. Our snow had practically all disappeared on Tuesday. Tuesday afternoon rain fell. All day on Wednesday, the heaviest precipitation for some considerable time occurred in the form of a wet snow.

News From An Old Friend

This week we had a letter from Geoff. Ranger, who is now located at Leask, Sask., and is still on our list of subscribers for the "Hill" town paper. He has a grain farm of about 210 acres of good land, four and a half miles from town. Their boy is doing well at school, and all in all Geoff. and his wife seem to be enjoying life. They send their remembrances to their old friends in this district. They report no snowfall there up to the present.

WHEAT OPTIONS

It's what we learn after we think we know that counts.

Car Overturns in Snow Bank

Dave Sneddon suffered a fractured collar bone and Bob Thompson superficial scratches and bruises when their car hit a snow bank and overturned one and a half miles north-east of Atlas. The men lay under the car about an hour before they managed to extricate themselves. The accident occurred about 11 a.m. They were brought to Empress and were attended to by Dr. McNeill.

Loverna Seeks Border

Areas Jurisdiction

Regina, Sask., Nov. 25.—Resulting from the announcement of the provincial government to frame legislation enabling the Manitoba to conduct civil affairs as one entity, the Loverna Board of Trade has petitioned the government to widen the scope of the proposed bill in such a manner as to create a 40-mile wide zone—20 miles each way from the Alberta-Saskatchewan border—in which automobile licenses could be interchangeable and in which hospital districts could be created with affiliation in either province.

The proposal entails some other details, but the ones mentioned are the important ones. If, however, it will be remembered, has come in for considerable mention in recent months. Part of the town is in Alberta and part in Saskatchewan. The result is that it has operated as two towns, with two town councils and two mayors, two school boards and other civic control duplicated. The recent disastrous fire made necessary more economic administration than the present form and then came the plan to introduce legislation to both legislatures which would correct the situation.

Loverna has not the same problem, though it is close to the same border line. Just what may be done by the Government to meet the request for a sort of neutral zone remains to be seen, but it has been intimated that grave difficulties would be encountered in carrying out any such scheme.

Mrs. J. Rauch left on trip to Lander, today.

Final Pool Payments Being Made To Members Of Coarse Grain Pools

Winnipeg—Coarse grains producers of Manitoba and Saskatchewan will be in receipt of full payment for their 1928-29 crops in a few days. Over \$1,600,000 in the main today final payments on members of the coarse grains pools of Manitoba and Saskatchewan, it was announced by G. H. McIvor, general sales manager of the Canadian Wheat Pool.

The last payment on the year-old crop brings the total initial and interim payments on coarse grains by the Central Selling Agency to the provincial pools of 61½ cents a bushel on numbers 1 and 2 C.W. oats; 60½ cents a bushel on extra 1 Canada Western and 3 Canada Western barley; \$2.20 cents a bushel on No. 1 N.W. flax, and 8½ cents a bushel on No. 1 and No. 2 C.W. rye, stated Mr. McIvor.

The final payments, now on their way to producers, include net payments of 6½ cents on all grade oats, 2 cents on all grades of barley, 2½ cents on all grades of flax, and 7½ cents on all grades of rye. All carrying charges have been deducted. Deductions for elevator and commercial reserve against the head were made from the previous interim payment, except in a few grades where full deductions were made in the July interim payment.

The total handlings by the coarse grains pools were as follows: flax, Saskatchewan—575,089 bushels oats; 1,010,710 bushels flax; 6,375,111 bushels barley; 2,584,532 bushels rye, with final payments of \$1,140,130. Manitoba—2,215,550 bushels oats; 12,876,124 bushels barley; 529,120 bushels rye; 17,210 bushels flax, with payments of \$486,929.44.

The total bushel handlings by both coarse grain pools was Saskatchewan, 15,254,414 bushels; Manitoba, 15,763,213 bushels; with total final payments of \$1,601,330.83 for the grand total of \$1,127,657 bushels credited to the two pools.

Issue Is Postponed
Ottawa—Investigation into the operation of the regulation which requires fifty per cent. British labor and material in cotton goods imports before they can obtain the benefits of the British preference has been postponed from November 7 to November 12. The tariff advisory board announced the change of date in a brief statement.

Submarine Sets Depth Mark
Spezia, Italy.—The Italian submarine "Tito Speri," 820 tons, submerged to the extraordinary depth of 343 feet in tests and remained there 20 minutes. Experimental hydrophone communication was carried on from the depth with the submarine "Sesena" on the surface.

Quebec Legislature
Quebec, Que.—The Quebec legislature will open its 1929 session on January 7, Premier Taschereau made the announcement following a cabinet meeting.

Canada Has Been Off The Gold Standard For Some Months Past

Montreal.—The Montreal Star says that because of the stringency which has existed in Canada for money and in order to protect Canada's position Canada has been unofficially off the gold standard for the past six months. At the verbal request of the Minister of Finance, the banks have been ordered to stop paying gold, although Canada's money has been at a discount which made it profitable to ship gold to New York.

Although the condition has been in existence for some time it was not generally known that the finance minister of the Dominion had taken the step which investigation now shows that he had. The situation is one which is regarded as being extremely acute and it is believed that the condition will right itself in the ordinary course of events.

In acting as he did, the finance minister was assuming unusual powers for the purpose. Although the practice was to ship gold under the circumstances, Ottawa acted under the belief that the gold situation of the country might be maintained during a period of abnormal strain.

The situation is one which is re-

Fire At E.P. Ranch

Old Original House Completely Destroyed By Flames
Calgary.—The famous ranch house and Canadian home of H.R.H. the Prince of Wales, at the E.P. Ranch, Pukaskia, Alta., was only saved from complete destruction by fire on Oct. 27, through the integrity of four stow-away ranch men and a timely fall of snow. Flames completely destroyed the old original house on the ranch which was being used as a power plant and pumping station.

Shortly after noon flames were observed coming from the old ranch house and the four men employed on the ranch started fighting the fire under direction of Jimmy McMillan, ranch foreman.

Between the new house and the burning mill there was a shed which was in danger of catching fire any minute. If the flames had reached this shed, the Prince's house could not have been saved.

When conditions looked to be at their worst, Foreman McMillan ordered a team of horses to be brought on the scene. The four men threw a rope around the shed and the team dragged it off the danger zone.

The lightning and water system on the ranch was put completely out of order by the fire, and the property damage was estimated at \$2,000.

An All-Canadian Menu
Food From Every Province Will Be Feature At Winter Fair

Ottawa.—A new food planning food gathered from coast to coast will be a feature, arranged by the agriculture department for the opening of the National Winter Fair at Toronto, on November 20.

There will be oysters from Prince Edward Island, fish from Nova Scotia, maple syrup from Quebec, beef from the west, fruit from Ontario and British Columbia—a complete menu from each and every province to suit the epicurean tastes of the cattlemen.

New Line Near Completion
London, Eng.—It is announced that the "Empress of Japan," the new 25,000 ton oil burner liner now building by the P&O Shipping Company, Ltd., Scotland, will be launched on December 17 by Mrs. E. R. Peacock, wife of E. R. Peacock, director of the Canadian Pacific Railway.

The "Empress of Japan" is to be placed on the Pacific service of the Canadian Pacific between Vancouver, Japan and China.

Russians Condemned To Death
Moscow.—According to despatches of the Tass News Agency, twelve Russians were condemned to death in various parts of the country for crimes that ranged from murder and arson to anti-Soviet agitation. They included two priests, one Muslim and four Irish peasants.

guards by financiers and economists alike at being executed under such circumstances should not be arrived at hastily. When the move was made to place an embargo upon gold, some six months ago, Canadian banking officials were frightened by the prospect of private manipulators using American money and demanding gold of the Canadian government.

The entire financial structure of the Dominion would have been gravely endangered if the finance minister had been placed in the position where he would have been forced to refuse gold in redemption of Dominion currency. The huge profits which would have been made by the transfer of gold have been disregarded by those who were in a position to take advantage of the situation.

The normal results of the crash in the New York stock exchange and other exchanges throughout the world will bring about an alleviation of the demand for New York funds. The drastic reduction expected in funds call in New York will be one of the main factors in bringing about a return to the old situation.

Writ Has Been Issued

General Higgins Asks Transfer of Salvation Army Property
London, Eng.—A writ on behalf of General Higgins, the new commander-in-chief of the Salvation Army, asking for transfer to himself of army property now held in the names of the executor of the late General Bramwell Booth has been issued.

The writ was served immediately on General Booth's executor, Mrs. Booth, Commissioner Catherine Booth, his daughter and a solicitor, Seath. The situation at present is that while all property of the army in Great Britain is controlled by General Higgins, its ownership remains in the hands of General Booth's executor.

Lipton Building New Yacht

Shamrock V. Being Constructed Under New York Club Rules
London, Eng.—The keel of Sir Thomas Lipton's new challenger for the America's Yacht Cup, Shamrock V, was laid at the Hammer and Nicholson's yard at Gosport without ceremony.

Sir Thomas was to present a 76-foot racing under the New York Club rules and will be fitted with a motor. The rig will be the same as that of the defender of the cup, thus promoting a stirring contest for supremacy.

Plan Pacific Air Liners

Monter Dirigibles To Operate Between California and the Philippines
Akron, Ohio.—Two monster dirigibles, the largest in the world are to be constructed and placed in regular operation between Southern California and the Philippines. In 1933, by the Pacific Zeppelin Transport Co., according to Paul W. Litchfield, chairman of the board. The Pacific liners will carry 80 passengers and ten tons of mail, express and freight. They will cut the half sea crossing time now made by the fastest boats.

Canadians Are Defined
Dominion Statisticians Set Contrary Of Long Standing
Ottawa, Ont.—Every one of Canadian nationality is a Canadian; every one born in the Dominion is of Canadian birth; and every one whose family has been of three generations' residence or more in Canada, is a Canadian "in a special sense," according to a report issued by R. H. Coates, Dominion statistician.

The report would seem to indicate a controversy of long duration as to just what constitutes "a Canadian."

Act May Be Amended
Ottawa.—The next session of parliament may see amendments to the insurance act covering the investments of insurance companies in common stocks, it was learned here.

Favorite Star Goes C.P.R.

FAMOUS WOMAN EXPLORER

Lady Richmond Brown, distinguished woman explorer, who has arrived in New York from England. In January she leaves for the wilds again at the head of an American-Italian expedition, with which Mr. M. Mitchell Hedges, famous explorer, will be connected. She was with Mr. Hedges when his party discovered the Chiniqua Indians in a hitherto totally unknown part of Panama.

Edmonton Students Hear Unusual Lecture

Former German Officer Gives Address At Edmonton Military Academy
Edmonton, Alta.—With a former commander in the Imperial German army relating his own experiences in the battle of Jutland, famous naval encounter of the world war, the Edmonton military academy heard an unusual lecture here.

Archie Ellsworth, who fought as a German officer in all the major naval engagements of the war, and who addressed the academy listened, came to Alberta two years ago, and is now a progressive farmer in the Brightnight district.

Is Protecting Employees

Chairman Of Chicago Firm Guarantees Stock Market Account
Chicago, Ill.—In a copyrighted article, the Herald Examiner said that Julius Rosenberg, chairman of the Board of Sears-Roebuck and Company has guaranteed the stock market accounts of the more than 40,000 employees of the company.

He has pledged his personal fortune of millions of dollars to prevent any employee facing the danger of having his savings swept away in stock market speculation.

Australian Wheat Estimate
Melbourne, Australia.—The 1929 Australian wheat harvest was recently estimated at 100,000,000 bushels, compared to 160,000,000 in 1928.

Albertus Was Huge Sum
Quebec.—George Kowalevich, of Hackett, Alberta, and James Westcott, of Springfield, Mass., won the first two prizes each receiving \$79,390.50 in the Army and Navy Veterans' sweepstakes on the Cambridgebridge race at Newmarket, England. The sweep was arranged so that each horse was drawn by two ticket holders. Both of these men drew Double Life.

Farm Parley Ashed
Capetown.—The agricultural conference here will ask the South African Union to call a conference of farming interests of all the dominions to be held in South Africa in 1931, for the purpose of securing inter-imperial cooperation.

Halifax—In a plebiscite on the liquor question the number of Nova Scotia voters who expressed a preference for government control and sale exceeded by more than 25,000 the number of those who indicated their desire that the present prohibition law be kept.

Both Dr. H. R. Grant, leader of the prohibition forces, and J. H. Winfield, leading the government control campaign, interpreted the figures as indicating the defeat of the prohibition law.

Two questions were before the voters but thousands voted on only one. The questions were whether the prohibition law, known as the Nova Scotia temperance act, should be continued or whether a system of government sale should be set up.

With only 45 small polls unheard from the government, a total of 1,137, the figures were:

For the temperance act, 61,672. Against, 56,024. For government sale, 89,577. Against, 41,180.

The vote will be interpreted officially by the government.

Frederic E. N. Rhodes said he would wait for more complete information before making a statement.

For government sale, and Prince Edward Island of the provinces Canada now have prohibition laws.

British Premier Faces Motion Of Censure On Foreign Policy

Upholds Alberta Court Ruling

Privy Council Says Certain Victory Bonds Liable To Death Duties

London, Eng.—The judicial committee of the privy council disallowed with costs the appeal of the Royal Trust Company against the government of the province of Alberta. The decision upholds an Alberta court ruling that succession duty is payable on certain Victory Bonds portion of the estate of the late Wm. Hull, such bonds being "legally situate" within the province of Alberta.

The ruling is important as establishing liability of Dominion government bonds to succession duties taxation and it is understood the province of Alberta is a large financial gainer by the ruling.

H. P. McMillan, K.C., of London, and Attorney-General Hon. J. P. Lymburn of Alberta, represented the province and Geoffrey Lawrence, K.C., London, and H. G. Noel, of Calgary acted for the trust company.

Received News By Radio

And V.C. Holder In Isolated Settlement Attend Prince's Dinner
Winnipeg.—Word of the Prince of Wales' dinner to be given November 9, in honor of all those who won on a radio, tricked into a little settlement 100 miles from Balmalm, Ariz., recently. Major J. McCreigh, stationed at the little settlement, received the news over the radio.

Major McCreigh, whose valor on the radio battle while serving with the 2nd Canadian Rifles, earned him the V.C., lost no time in setting out on a hurried trip to New York from where he sailed on the S.S. Olympic for London. He raced 100 miles by auto to the railway station at Balmalm, Ariz., where he arrived only fifteen minutes before his train left.

Destroyers Ordered To China
U.S. Decision Intended To Remain At Manila Several Months

Manila.—Orders despatching the 45th destroyer division immediately to Chinese waters, "in view of a possible need there," were received at Manila, where the fleet was.

The destroyers arrived here recently for the navy day celebration, and had apparently intended remaining for some months.

Naval officials were reluctant to do the order returning the destroyer fleet to China, whence it had just returned.

Albertus Was Huge Sum
Quebec.—George Kowalevich, of Hackett, Alberta, and James Westcott, of Springfield, Mass., won the first two prizes each receiving \$79,390.50 in the Army and Navy Veterans' sweepstakes on the Cambridgebridge race at Newmarket, England. Victory Of Canadian Women

Believed That Judgment Of Privy Council Will Mean Eligibility Of Women For House Of Lords

"The House of Lords next." That is the thought which runs all through the comment on the judgment of the Privy Council, which recognized the eligibility of women for appointment to the seats of Canada as a despatch from London, England.

Practically every newspaper in Britain gives prominence to the ruling. The victory of Canadian women is, in general, felt, can scarcely fail to affect the claim of women to sit in the House of Lords as peers in their own right, whether by inheritance or creation.

Mrs. Helen Archibald, president of the Women's Peace Society, which is agitating for peeresses in their own right to be admitted to the upper chamber, declares the judgment certainly strengthens their position considerably.

Mrs. Collins, organizer of the British Commonwealth League, describes the judgment as a real triumph. "It is far more significant and far-reaching than it is possible even for lawyers to comprehend," she says.

The Daily Herald says: "The public opinion of the British Commonwealth women, who appealed to the Privy Council against the Canadian superior court's decision, is splendidly justified in the event. And while supporters of the doctrine of electoral equality will everywhere welcome this latest victory in a hard-fought and many-phased battle, nowhere will it be welcomed more wholeheartedly than in the labor and socialist movement."

"Perhaps the second chamber may remain the last male reserve, but not, we suspect, for many years more," concludes the Daily Telegraph. The British end of the controversy dates from 1919, when a seat in the House of Lords was claimed on behalf of Lady Rhonda, a peeress in her own right. A private member's bill was passed in the Commons enabling women to exercise all public functions, but did not get through the House of Lords. Later the government sponsored a similar bill with a specific clause enabling the King to summon a peeress otherwise qualified. The Lords rejected the clause and the Commons reinstated it. The Lords threw it out. After a long legal battle the matter was dropped until Lady Asquith introduced a new bill, which, so far, has not met with any success."

The Empire's Future

British Dominions Have Millions Of Acres Not Yet Developed

There are probably some 25,000 million acres of land within our imperial boundaries which are available for development. In Canada alone barely one-tenth of the possible soil is actually in use, and there is much the same story to be told all over the world, where the races are held away. We need not, then, reconcile ourselves to poverty. We are potentially not only the richest people in the world, but also the richest people the world has ever known.

British Are Thrifty

Rt. Hon. Philip Snowden, chancellor of the exchequer, before the international thrift congress at London, England, pointed out that despite the unemployment in Britain, more than \$7,000,000,000 was invested in thrift organizations and the amount was steadily increasing.

Tar Sands Development

Development of the tar sands and salt deposits at Fort McMurray, Alberta, along profitable lines, will be studied by experts and engineers of the Canadian Pacific and the Canadian Northern Railways, according to E. W. Beatty, Chairman and President of the Canadian Pacific.

"That is the hole through which a ring was stolen from the coffin of the King of the Goths. The thief was 'When did it happen?'"

"In the year 300."—Lustige Blätter, Berlin.

"N. C. 1519"

The Hoarding Of Money

Miser Is Not the Only Person Who Does This

A woman found dead in a small apartment in a poor quarter of New York was found to have savings amounting to \$500,000.

Evidently she belonged to a type of individuals who live in fear of dying in want, and dye themselves the victims of miserly habits, although they have plenty. Such people are rightly dubbed eccentrics.

Yet there are many people who practically do the same thing, only living comfortably. They are not small citizens in every way except that they lack the same thing, only living comfortably. They are not small citizens in every way except that they lack the same thing, only living comfortably.

A man lives to a good old age. He gives his family all reasonable needs, and contributes faithfully to community purposes. Yet he never "steps out" to enjoy the good things of life. He never travels, nor puts into his home any of the real luxuries that make the journey happier in the way that the people of lesser means dream of doing on the day when "their ship comes home."

He never spends much more than the average man every week. But it is found when he dies that he has left one, two or three hundred thousand dollars to be divided among the younger members of his family. If he had spent a few thousand dollars a year, his family would have been better off, and his family would not miss it when the shareout came.

Between the person who is regarded as eccentric in hoarding money, and the man who accumulates money who he never enjoys the line of demarcation is quite thin.

Storing Potatoes

Proper Storage Of Tubers Is A Matter Of Great Importance

The short potato crop this year in many parts of the country makes it necessary to take steps to avoid loss by rot in storage. Late light and rot causes tremendous losses. The potato crop in most years. Covering a five year period of investigation it was shown that in unimproved potato fields in Prince Edward Island, the light was chiefly responsible for reducing the yield to an extent of 150,000 bushels to the acre. This investigation was carried out by the botanical division of the experimental farms. The result of the study with recommendation for controlling the disease is contained in Bulletin No. 119, of the Department of Agriculture, at Ottawa.

Proper storage of the tubers is a matter of great importance. While light rot, it is stated, does not spread from tuber to tuber in storage, if it should be exposed to damp poor storage conditions the way is paved for spreading the disease. Before placing in storage, it is recommended that the crop be allowed to sweat in a pile for a few days. This causes the tubers to be dehydrated and discolored. Dry storage not higher than 40 degrees Fahrenheit, in temperature, will retard the development of the blight rot.

Have Never Seen Auto

California Family Lives Where Pack Horses Are Used

California, the state which boasts one automobile to every family, and two for most, has at least one family of six children that never has seen an automobile.

This is the story told by Wesley and Ernest Hewitt, members of an automobile firm at Modesto, California, after a deer hunt in Mendocino county's wilds.

The two Modestans went so far back into the timberland of the northern country that they had to leave the roads and use pack horses. At the end of their journey, they found a mountain family with whom they camped. The six children of the family, the Modestans said, tramped five miles daily to school, had never seen an automobile except in pictures, had never witnessed a "movie" nor heard a radio.

The hunters said the family lived upon an abundance of food. Meals served consisted of different foods grown or killed near the mountain cabin, they said.

In Final Stages

Research with the object of producing a rust-resisting wheat is today in its final stages at the University of Saskatchewan. Tests which involved the seeding three years ago of 45,500 hybrid strains of Marquis wheat have reduced the total to only 35 varieties. Experiments for root rot resistance are still required.

James: "Why, I thought your car was a self-starter."

Brown (cranking heavily): "It was—in the catalogue."

Canadian Eggs Grade High

Should Not Be Affected By Britain's New Marketing Act

Canadian eggs will be hereafter reach the British market will be confronted with a new condition. There is now in effect a new marketing act in the Mother Country which requires that all imported eggs from the various parts of the Empire must be clearly marked with ink "Empire," or with the country of origin. W. A. Wilson, the Agricultural Products Representative for Canada in Great Britain, has expressed his view of the situation in a statement forwarded to the Hon. Dr. Motherwell, Minister of Agriculture, in which he speaks with confidence of the position that Canadian eggs will occupy. The quality of Canadian eggs as compared with that of competitors who supply storage eggs, he says, is excellent. This state of affairs he regards as a direct result of the operations of egg grading in this country. Canadian eggs under the new situation, Mr. Wilson considers, are without a handicap, and although Canada's relative future position in the egg market cannot be forecast with certainty, it may be viewed, in the opinion of Mr. Wilson, as one offering encouragement.

He never spends much more than the average man every week. But it is found when he dies that he has left one, two or three hundred thousand dollars to be divided among the younger members of his family. If he had spent a few thousand dollars a year, his family would have been better off, and his family would not miss it when the shareout came. Between the person who is regarded as eccentric in hoarding money, and the man who accumulates money who he never enjoys the line of demarcation is quite thin.

Pays His Own Penalty

Heavy Eater Does Not Menace Others Like Heavy Drinker

"Heavy eater is much nearer danger than he who drinks too much," according to a headline on a Chicago despatch, quoting a speech of Dr. Edward Martin of Philadelphia before the American College of Surgeons. But the speaker failed to take into consideration the number of innocent people who may have their lives shortened as a result of another man drinking too much. The man who overeats may shorten his own life, but he does not jeopardize the lives of other people.

Power Scheme For Edmonton

The entire power line from the plant at Ghost River to supply Edmonton under the new agreement will cost in the neighborhood of \$1,200,000, according to an announcement of the Calgary Power Company.

Germany led the world in the increase of merchant shipping last year.

GOVERNOR-GENERAL WELCOMING RAMSAY MACDONALD

Lord Willoughby, welcoming Premier Ramsay MacDonald to Canada upon his arrival at Ottawa after his memorable visit to the United States.

Seed Corn For Next Year

Method Of Drying Corn On The Cob For Next Year's Planting

If locally grown seed corn is to be depended on for next year's planting it is important that the seed be properly dried and wintered. When brought from the field, corn on the cob contains from thirty to forty per cent. moisture. This moisture must be reduced sufficiently so that it will not be damaged by either disease or freezing.

A good method of drying the seed and keeping it until the winter is explained in a new bulletin from the Brandon farm, entitled "Corn Drying in Manitoba." Mr. Thilke, the Superintendent, and his associates, recommend hanging up the ears, or placing them in racks in a dry, well-ventilated room. It may be necessary to keep a fire in the drying room, and to provide for a good circulation of air. Seventy-five pounds of ears when dried will give about fifty-six pounds of shelled corn.

Some Manitoba corn growers plant the bulk together, suspending the ears in strings. This Bulletin which is numbered 121, of the Department of Agriculture, at Ottawa, contains illustrations of devices for holding and drying corn on the cobs. At the Brandon Farm corn is dried in racks. The cobs are piled like corded and are held in place in racks that are illustrated in the bulletin, which is obtainable from the Publications Branch, Department of Agriculture, at Ottawa.

This Bulletin covers the whole subject of corn growing in Manitoba, and relates the history of the culture of this crop which shows that it has been cultivated in this province for perhaps one hundred years.

Seed Crops Inspection

Dominion Seed Branch At Saskatoon Reports On Work For 1929

The Dominion Seed Branch at Saskatoon reports the following areas of seed crops inspected in 1929: wheat, 28,752 acres; oats, 4,768 acres; barley, 1,307 acres; rye, 228 acres; and flax, 1,574 acres. The estimated yields from inspected crops are: wheat, 567,467 bushels; oats, 225,801; barley, 38,328; rye, 4,566, and flax, 13,788 bushels. The total area inspected in 1929 was 36,695 acres against 18,188 acres in 1928.

Found Rat-Proof Porcupine

A porcupine with rattles on its tail and a roadster restoration specimen sent to the Field Museum in Chicago by the Kelly-Rosevelt expedition in Alaska. Although the rattles differ widely in construction from those on rattlesnakes, they create a sound very similar as the animal prowls about in the grass.

The Greeks are reported to have used coal more than 5,000 years ago.

Intelligence Is Not Based On Education

Brains Are Inherited, Says Psychologist Of Colgate University

Brains are a matter of heredity, says A. Laird, of Hamilton, N.Y., director of Colgate University psychological laboratory. Physical differences in brains, he adds, do not seem to improve one's regular equipment of "brains," he added. "Children who are found by tests to have a little less than the usual amount of brain in the first grade are still a little behind the average when they are in the fifth grade, and in case they reach the eighth grade, they still tell a little below."

"Intelligence is not increased by going to college. Neither is it a chance affair. Parents with brains much above the average have children with brains much above the average. Brains seem to be quite definitely inherited, just as eye color, stature or temperament."

"Education does not improve intelligence, what makes college men successful? Of hundreds of thousands of men tested in the army during mobilization, the average score was 65. After the war the same test was given to a large number of students of universities and colleges. The first time the average score by these freshmen was 100."

It does not mean that the college freshman has twice as much intelligence as the army man, since the army score does not start with zero. The difference does mean that the ordinary college man is much better equipped with brains than the ordinary man on the streets."

Made Tidy Profit

Girls Given Ten Dollars For Dollars' Day Of Sympathy

There is a lot in Canada noted for us, and two young ladies returning from there decided to bring back two bags of sympathy for friends in New York. Mothers, they crossed the border at Rouleau. The inspector, after looking through their baggage, sniffed at the girls, grinned, and waved them on. This, the girls noticed, brought forth a lot of amusement from two young men in the roadster, directly behind them. Further along the girls stopped to buy a hot dog. The inspector, who was looking out of the window to see the two fellows in the roadster drive by to buy a hot dog, saw the girls and their mother, and they were off and whirled away. They rushed out and found on the driver's seat a ten-dollar bill and a note which said: "If you find that two men could get more fun out of a jug of whiskey than two girls could and that anyhow, fifty-fifty split, and if it happens, they were off their percentage. The syrup had cost only a dollar a jug."

Canada's Important Position

In Proportion To Population, Dominion Ranks High As Producer

Although Canada possesses only about one-half of one per cent. of the world's population, the Dominion produces about nine per cent. of the world's wheat, over 10 per cent. of the world's oats, nearly 10 per cent. of the world's gold and silver, 15 per cent. of the world's wool pulp, and 50 per cent. of the world's nickel. Canada contains 16 per cent. of the world's known coal resources, has greater asbestos and nickel deposits than any other country, and ranks third in the production of gold. Canada ranks eighth among the countries of the world as a producer of chrome and fifth as a producer of bismuth.

Witch Wood Not Help

Many papers in the United States are urging that highways should be built wide so that there will be room for pedestrians along the side. No matter how wide they are made the motorists would use the entire width. A raised cement barrier, fencing off a sidewalk preserve for the pedestrian, might do the trick.

Starting Engine In Cold Weather

Starting a car on a chilly morning will be found easier if the engine is turned over with the crank handle a few times and then release the clutch before stepping on the electric starting button. Batteries become weak in cold weather. The engine becomes difficult to turn over because the oil becomes stiff.

Also Sun Proof

Mrs. Shoplot—You say this material is the very latest in fashion? Clerk—Yes, madam, and it's shrink proof.

Mrs. Shoplot—But it will fade in the sun?

Yes, no, madam; it's been in our window for two years.

The Adolescent Age

Duty Of Parents In Helping A Young Boy Or Girl Through Early Life

There is no more critical time in a child's life than the adolescent period—that is to say, from twelve years old to sixteen years old for a boy, and from twelve years old to twenty years old for a girl.

Those of us who have been through the experience of helping a young boy or girl through this time know how true it is to say that there certainly are quite a few problems. But we must not allow them to know too large, so that we lose our sense of proportion. We all know that children are about the most things there are in the world, and we cherish them and find them a constant source of pleasure. We must remember that we aren't little angels without any faults ourselves. So if your son, when he is in the adolescent period, becomes a bit restless and hard to handle, or your daughter becomes a trifle rebellious, just remember that it is perhaps normal, and that he or she will probably, with a little help, overcome everything that he or she thinks they know everything. By and by he begins to get out and meet other people, and then his friends, his school teacher and his Sunday School teacher, and his playmates, and neighbors that he never heard before, all come to him. There are even things about which his parents don't know anything, and his early over-estimation of him is apt to be over-estimation.

Yet there is nothing very serious about them. In fact, psychologists who have studied this very matter have come to the conclusion that if a child didn't pass through this period of adolescence, it would mean probably that there was something seriously wrong. He would remain a child, and be unfit to go out and assert himself as he needs to, in the outside world.

The troubles of a young boy or girl are just as enormous to them as your own are to you. If you make him your confidant, he will come to you with his problem, and you can help him. If he is ridiculed, or nagged, or treated with undue harshness, he never will, and the parent must see these things is apt to lose his greatest hold on the boy.

To lose one's temper with a young boy or girl, is a sign of weakness that he or she will never forget. He should never be punished in anger. Neither should he be permitted to be habitually disobedient. Firmness with him in the things he does after he has been told are wrong, is essential, and so is teamwork on the part of his parents. They should agree on what he is to be taught. If one feels he can do something and the other feels he can't, he is apt to lose confidence in them both.

Proper sleep, nourishing food, and plenty of air and sunshine, are further essentials to the development of the young boy or girl. They should be served only with good plain food as far as possible, with vegetables, eggs, milk, fruit, predominating in their menu. They should be encouraged to play and to exercise in the open air, because the day is not far distant when they will require all the strength they can summon for their daily work.

How Grasshoppers Breathe

Grasshoppers which, like all other insects, have no lungs, breathe through an intricate system of air tubes ending in tiny valves in their sides. The insects are able to control the operations of these pipes and porches at will.

Figures Showing Cost Of Wars Should Bring Home To Everyone The Futility Of Armed Conflict

Everyone must fight if we have another war. The fighting won't be only on the battlefields. There will be fighting on the land and on the sea and in the skies. It will be carried right into the homes of the people. Everyone will fight and everyone will lose. The cost would be unthinkable, and part of the price might be our civilizations. Even the victors must lose in modern warfare.

The Napoleonic wars (1790-1815), a conflict that lasted 9,000 days, killed 2,100,000 human beings, and cost \$3,070,000,000.

The American Civil War (1861-1865) lasted 1,350 days, cost 635,000 lives, and \$1,000,000,000.

The Franco-Prussian war (1870-1871) lasted for 210 days and cost 284,000 lives and \$1,210,000,000.

The Russo-Japanese war (1904-1905), lasted 548 days, cost 160,000 lives and \$2,100,000,000.

The above figures are for wars of the recent past, but how they pale before those of the World War I.

The World War I (1914-1918), lasted 1,563 days, cost 9,818,000 lives and \$186,233,697.

Now, all the real property in the United States, from the Canadian border to the boundaries of Mexico, and from the Atlantic to the shores of the Pacific Ocean, are worth considerably less than the cost of the World War.

It should interest and impress all engineers, business men, and all people with common sense to learn that all the steam railroads and their equipment, all the motor vehicles, all the street railways, all the telephone systems, all the electric light and power stations of the entire United States of America could be purchased for a sum of money considerably less than one-quarter of the cost of the World War.

We have been told that all the money raised from the peoples of the earth in taxation, eighty cents out of every dollar goes to defray the costs of the wars of the past and in the preparation of future wars. The thing is absurd—General Electric Review, 1929.

Prizes For Canadian Fruits Exhibits From Dominion War Awards At British Exhibition

Thirteen first prizes in apples, one first in pears and four seconds in apples were awarded to Canadian exhibitors at the Imperial Fruit Show, which was held at Bingley Hall, Birmingham, according to cables received at Ottawa by the Department of Agriculture. Eight of the first prizes were won by Nova Scotia apple growers, and four by British Columbia. Nova Scotians secured the three second prizes. The most successful individual Canadian exhibitor was Charles A. Bentley, of Berwick, N.S., who secured no fewer than five firsts. The Associated Growers of British Columbia, Limited, of Vernon, B.C., obtained three.

The British Columbia company was also successful in the British Empire section, securing a first and second prize.

Record For Building

Building permits issued in Canada during the first eight months of this year reached a total of \$168,606,000. Not only was this the highest for the period ever recorded by the Dominion Bureau of Statistics, but it was 16 per cent. above the previous high record in 1925.

Then there was the Scotchman who, when asked what he had dined on in his flat, answered: "My wife's false teeth—she's been eating between meals."

Venice, Italy, is built on seven hills, and is called "The City of the Seven Hills."

In 1922 the first telephone conversation across the Atlantic took place.

"You eat all day, but work? Never. I don't believe you are listening to what I say."

"No thought you were talking to yourself, sir"—Luttwig Kolner Zeitung, Cologne.

Rural Credits

Dominion Farm Loans Board Now Operating In Six Provinces

The province of Manitoba, which has just recently come within the scope of the Dominion Farm Loans Board's operations, brings the total of the provinces now embraced within the scheme up to six, declared Dr. J. D. MacLean, chairman of the board here recently, Alberta, British Columbia, Manitoba, Quebec, Nova Scotia, and New Brunswick, are the half dozen in which the board operates.

Saskatchewan and Ontario have provincial systems of rural credits, while Prince Edward Island apparently is in need of neither the one or the other.

The work of the board has been extended only recently into Quebec and Manitoba, and so far no applications for loans from these provinces have been received.

Since its inception until October 16 last, the board has approved \$70 loans to the four provinces of Alberta, British Columbia, New Brunswick, and Nova Scotia, of which have been rejected 178 and 178 are pending. The total amount of money extended to applicants is \$100,000.

Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which has been in existence for some time, has been successful in securing a new contract with the publishers of the city.

Expedition Of Graf Zeppelin Will Investigate Scientific Subjects

Dr. Walter Blanton, secretary and treasurer of the Aerial Arctic Society, announced plans for a voyage of Arctic exploration aboard the Graf Zeppelin to be taken next April by a group of 12 scientists headed by Fritz Jof Hansen. The principal objects of the projected expedition, Dr. Blanton said, would be to make the boundaries between the deep and shallow parts of the Arctic waters, to study meteorological conditions and to prepare for the establishment of scientific stations in the ice fields.

Changed Methods in Handling Milk

When proper sanitary measures are maintained the bacteria in a drip of milk die.

How much do the farmers and dairymen of Canada and United pay in loss to bacteria in milk? In process of arriving at the answer to this question, representatives of leading milk and dairy products companies of New York recently met with officials of the State Agricultural Experiment Station with the Department of Farm and Markets and the College of Agriculture at the Experimental Station, Geneva.

The bacteria count being used more and more as a basis for determining how much per pound a farmer is to be paid for his milk, getting the bacteria count and giving figure means millions of dollars annually to dairymen. Dairymen, themselves, are alive to this question, and where they can get a material part of the income from the farm, complete sanitary precautions are being taken to insure a low bacterial count in the milk.

Precautions start at the beginning of milk production and continue clear through until the time the milk is in the hands of the consumer.

To begin with, properly ventilated, clean and stable are provided. A plenty of bedding is given the cows; platforms are built the right length to accommodate the particular breed of cows that are kept; the gutter is built wide and deep; the animal

Four Russian aviators flying the "Land of the Soviets" from Moscow to New York, took off on October 19, from Vancouver, Wash., for Oakland, Calif., first stopping point of their final long hop across the United States. The fliers were forced to land on account of engine trouble. The photographs show: (1) "Land of Soviets," (2) Philip Bolton, second pilot, (3) Dmitry Pustov, mechanic, (4) Semen Shastakov, chief pilot, and (5) Boris Bystryakov, navigator.

Received Crew Training Says British Empire Not Commonwealth

Men Unacquainted With Farm Work Returning To England

Some 200 men, who are returning to England, admit that though they accepted training there at the public expense, together with free board and free transportation to Canada, they never intended to do farm work. If their statement, that they never saw a cow or a plow in the course of their training is correct, it would be interesting to hear what kind of training they were given and how much it cost. Taken together, the men's confession of their dislike for farm work and complaint about the training suggest an explanation of the refusal of the Canadian farmers, with whom they were placed, to pay the promised wage of 10 pounds a month.—Truth, London, England.

To Study the Arctic

The White House was first painted white to obliterate marks of fire left by the British invasion in 1814.

Hallmarks are frequent and severe in sub-tropical regions and are rare in the coldest parts of the earth.

The wife: "There are two ways of looking at every question."

The husband: "Yes, I know. Yours and the wrong one."

Predicts That Crow's Nest Pass Agreement Will Govern Grain Rates On The Churchill Route

Lights Make Hens Lay

Increases Winter Production But Does Not Affect Yearly Total

In view of the fact that fresh eggs are nearly always a higher price during the winter season than during the summer, many poultry men have been interested in the possibility of increasing winter egg production by the use of artificial lights.

At the Dominion Experimental Station, Kapuskasing, Ontario, an experiment has been conducted for a period of five years in order to obtain some data on this subject. The experiment covered a period of six months each year, from November 1 to April 30, during which time the electric lights were turned on 2,000 hours in the morning and remained on until daylight. One hundred pullets were used. These were divided equally as to weight, general development and breeding into two pens of 50 each. All conditions were made similar except that the one pen had these extra hours of light to work.

Over a five-year period the pen on lights produced on the average 3,566 eggs, at a cost of 20 cents per dozen, in the six months; while the pen without lights produced 3,671 eggs at a cost of 20 cents per dozen. This gives an advantage of about 300 eggs for the pen on lights and at a reduction in cost of 2 cents per dozen.

During two of the years covered by this experiment the test was made until October 31, instead of the complete year. In the two-year average over the whole year, the pen with lights laid fewer eggs than the pen without lights.

From the figures obtained to date it would appear that though lights have an effect on the number of eggs laid during the winter months, when the eggs are highest in price, but on the other hand they do not seem to materially alter the total number obtained for the whole year.

Increased Demand For Beef

Beef prices in Canada next spring will be high, due to the fact that there is a shortage of beef cattle in the country and comparatively few calves going into winter feeding.

Trade reports for September show the exports of fresh beef to the United Kingdom as being nil, and the United States there was a falling off from \$1,107,208 to \$487,912.

No fresh beef has been shipped to the United Kingdom for several years. At present the price in Canada is so good and the demand so steady that there is only a spread of two cents a pound between the best English killed beef and Canadian beef. The cost of transportation is three cents a pound so that it does not pay to ship.

Supplies of cattle reaching Canadian markets at the present time are very moderate, say officials of the livestock branch, both in Eastern and Western Canada. There has been no psychology, however, no forced selling, so the farmers have not done so badly.

The domestic demand at good prices indicates a measure of prosperity in the country, when people are able to buy meat at good prices despite the competition of the American consumer wading Canadian beef.

The Psychology Of It

If you scamp the other fellow's fender, it is because he didn't give you enough room. If he scamp your car, he is a nitwit driver whose life and soul should be taken from him. And just so long as this is the psychology of handling cars, the space will be set aside in the newspapers each day to record accidents.

A mouse can pick up a scent more than a mile away.

He: "Have you heard that I have been an actor?"

She: "No, I only heard that you were on the stage."—Muskie, Vienna.

In the opinion of Hon. Charles A. Dunning, Minister of Railways, the Crow's Nest Pass agreement will govern the established rates on grain and flour on the Hudson Bay Railway.

"There is no doubt in my mind," he said today, "that grain will travel to Churchill on a mileage basis the same as to Fort William." Mr. Dunning explained that he could not speak in regard to general defers rates, but grain was in a different category.

"In respect of all other rates," he said, "when the road approaches operation, the Canadian National will have to file their rate tariffs with the Board of Railway Commissioners, and it will be for them to appeal against these rates if they are not satisfactory."

Mr. Dunning said that he had been pleased to note that the people of Saskatchewan, in this respect, had not been inactive. "The traffic organization of Saskatchewan, he believed, had been accumulating information on Hudson Bay route rates for some time, and it was his hope that the interests of shippers at the proper time before the rate making body—the railway board.

He said that a matter of fact, has paid much less attention to the rate rail rates of the Hudson Bay Railway, at a cost of 20 cents per dozen, in the six months; while the pen without lights produced 3,671 eggs at a cost of 20 cents per dozen. This gives an advantage of about 300 eggs for the pen on lights and at a reduction in cost of 2 cents per dozen.

From the figures obtained to date it would appear that though lights have an effect on the number of eggs laid during the winter months, when the eggs are highest in price, but on the other hand they do not seem to materially alter the total number obtained for the whole year.

She: "No, I only heard that you were on the stage."—Muskie, Vienna.

Identity Not Important

The Governor of the State was inspecting some of its institutions. When he reached one of the insane hospitals he received a message to call his office on an important matter. No getting away from it, he thought he should, he barked at the operator. "I guess you don't know who I am?"

"No," replied the operator, "I know where you are."

THE TASTEWORLD HAPPENINGS
BRIEFLY TOLD

Marie, of Roumania, most unconventional and perhaps loveliest and loneliest of Europe's queens, celebrated her 51st birthday on October 20.

It is announced that E. W. Beatty, K.C., president of the Canadian Pacific Railway, has accepted appointment to the Canadian Olympic committee.

During September, the first month of the apple-shipping season, 89,476 barrels left Halifax for the overseas markets. This was more than double the exports of September, 1928.

Kay Doo, noted racing car driver, announces that an automobile in which he will seek a world's speed record, at Daytona Beach, Florida, has been nearly completed.

During his speech to the Canadian Club, while in Quebec, Premier James MacDonald confided to his audience that he proposed to visit Hudson Bay, no matter who attempted to deter him.

Six men, jumping simultaneously from a 19-passenger airplane, demonstrated the possibility of safe descent from a disabled plane. The demonstration was made at Roosevelt Field, New York.

Lowest Infant Death Rate

Report Shows New Zealand Has Fewest On Record

"New Zealand's the best place in the world to be born. Babies born there have more chances of living than those of any other part of the globe."

That is Dr. Carrick Robertson's way of expressing the fact New Zealand's death rate among infants is the lowest on record for any country. However, grown people don't fare much better in New Zealand than in other first rate countries. Sir Carrick added, "In the main, health conditions are good, but we have some diseases that are peculiar to certain parts of the country, and these are quite a problem."

"Gout is, perhaps, one of our worst diseases. It is caused from a lack of iodine in the soil, and there are a good many stretches in New Zealand thus affected. The younger generation is being protected to a certain extent by being fed iodized salt at school and many of the adults use iodized salt to combat the disease. Cancer, too, is just as infectious in New Zealand as elsewhere."

Find Body Of Prospect

Mounted Police Locate Body In Barren Lands Of Far North

The body of Joe Rutherford, old time prospector, who lost his life one year ago when a blizzard swept the barren lands of the far north, was found by Royal Canadian Mounted Police, it became known recently. Tom R. Cowan, of Toronto, Rutherford's partner, who suffered so greatly in the name blizzard that both legs had to be amputated, was notified that natives and Mounted Police had located the body where he had directed Staff-Sergeant Joynt, at Chesterfield, to hunt for it. The body was buried where it was found.

Some men are like silver-plated knives; they look bright but are very dull.

The Balkan Peninsula contains more native species of plants than any other country of Europe of the same size.

In the rural districts of Sweden every parish forms a self-governing community.

Asthma

Is relieved by MILDRED, spread in brown paper and applied to throat. Also inhaled.

Caught Him Off Guard

Plaintiff Lost Damage Case Through Cleverness Of Lawyer For Defence

A legal friend of mine told me the other day a good story illustrating the value of cross-examination in the hands of an expert at the game. At the time when the present Lord Brixton was plain Mr. F. E. Smith, he was retained by a tramway company in a running-down case. The plaintiff, a man of the laboring class, had had his arm injured, and he claimed that the injury was permanent and prevented him from working. If his case was correct, it was a case for heavy damages. Mr. Smith, however, was convinced that the man was exaggerating. The difficulty was to prove it. After several more or less irrelevant questions had been put and answered, Mr. Smith said to the plaintiff quite casually: "Would you mind showing the jury how high you can lift your arm since the accident?" The man, apparently, with some difficulty, raised it to his shoulder. "Now," said Mr. Smith in the tone of one who was sure of his ground, "how high you could lift it before the accident?" Up shot the plaintiff's arm, well above his head! The future Lord Brixton's insight into the man's mentality had won the tramway company their case.

Shipment Of Pure Bred Rams

Four Carloads Shipped From Ontario To Western Canadian Ports

But it is hoped to be the first of a series of shipments of purebred rams from Ontario to the western ranches has just reached the prairies. The four carloads of 270 good purebred rams included Lancers, Cotswolds, Leicester, Hampshire, Southdown and Cheviot. They were shipped by officials of the Canadian Co-Operative Wool Growers Limited, who, along with the wool committee of the National Research Council, have been active in promoting sheep and wool interests in Canada. In the past large consignments of these animals have been sent to the Western States for breeding with the native stock.

Crude Petroleum Production

Alberta Produces About 80 Per Cent Of Total For Dominion

Figures published by the Dominion Bureau of Statistics show that during the first six months of the present year 470,238 barrels of crude petroleum, valued at \$1,618,025, were produced in Canada. This is an increase of 168,670 barrels, or 56.2 per cent, over the first half of 1928. The Province of Alberta contributed about 90 per cent. of the total for the Dominion, having produced 405,970 barrels.

Smothering Spells

Couldn't Walk Far Gassed For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes: "I have been troubled with smothering spells, and I was threatened with gas for a short distance, on account of having to gasp for breath."

A friend told me of a case in which I did, and in a short time I felt much better.

Price, 60c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. W. Roth Co., Limited, Toronto, Ont.

Pleased With Trial Shipments

Good Market Created In Dutch East Indies For Dutch Canned Apples

From trial shipments of apples made in 1928, it has been definitely ascertained that there exists a market for Dutch Canned Apples in Malaya and Dutch East Indies. During the three years a steady increase is shown in the number of boxes ordered by Dutch Canned Apples, since 1926, and the prospects are that 1929 will see a still further increase. Australian and New Zealand are also chief sources of supply, followed by the United States Pacific coast.

B.C. Exporting Lead and Zinc

A Large Movement of 3,500 tons of Lead and Zinc Concentrate from Field, B.C., will begin shortly to flow through the Port of Vancouver, the zinc to Japan and the lead to the United States.

Newspapers were the only material used for the whole of a house, with the exception of the frame work, the windows and the floor, built in Massachusetts by a married couple.

Dr. Guild's ASTHMA CURE

Contains 6 capsules of purest ingredients.

Canada's Sound Position

Prosperity Due In Large Measure To Agricultural Development

"We are all primarily conscious of the fact that this country, measured by any of the yardsticks by which the prosperity of a nation can be gauged, is a very prosperous country, notwithstanding disturbing stock market and a rather unusual grain situation, both of which are, we hope, temporary," stated E. W. Beatty, chairman and president of the Canadian Pacific Railway, at a dinner given in his honor by the St. Catherine's Club of Montreal.

"There is, perhaps," continued Mr. Beatty, "no one reason to which we can attribute all the improvement in Canadian conditions in the last few years, but there is one which stands out above and beyond all others, and that is the impetus given by the drive, crop, large in volume or in money value. We hope the time will come when our prosperity will be said to be equally balanced as between agriculture and the development of natural resources and industry, but for the moment we are pre-eminently still an agricultural country, and that when providence ordains that our crops shall be large we are almost inevitably prosperous."

Lighted Arrows Show Direction Of Liners

Visible Signals May Largely Diminish Chances Of Disasters

Bird liners in the near future may warn each other as regards the direction in which they are being steered by means of large lighted arrows displayed on the bridge, following experiments carried out by the Royal Dutch line.

There have been many collisions owing to the international signals on the steamship "Batavier V" consisting of three arrows conspicuously placed on the bridge. One is horizontal, with the point to starboard, the horizontal, and the third is vertical, with the point upwards. When lighted, the arrows signify respectively "I go to port," "I go to starboard" and "I continue my direction."

Canadian and British authorities are closely watching the experiment well, in view to the general adoption of the plan.

Beer Brewing On Increase

More Beer Brewed In Canada Last Year Than In 1927

More beer is being brewed in Canada. In 1928, gross production of breweries reached a value of \$60,910,000, an increase of \$1,160,000 over 1927. Net production value was \$46,172,912, as compared with \$34,066,725 in the preceding year. At the same time the number of establishments increased to 78, five more than a year ago, and capital invested moved up to \$67,148,960 from \$62,258,117.

By provinces, plants were distributed as follows: Ontario, 36; British Columbia, 36; Quebec, 8; Manitoba, 8; Alberta, 3; Saskatchewan, 7; New Brunswick, 2; and Nova Scotia, 2.

Material used in the industry cost \$20,737,485. Canadian malt accounted for \$7,409,992; foreign malt, \$1,961,820; bottles, \$5,926,696; cartons, \$1,515,371; and hops \$1,134,690.

Exports in 1928 had a value of \$5,148,650, a slight reduction from the figure of \$5,481,707 in the preceding year. Imports advanced to \$28,691,000 in 1928, from \$22,952 in 1927.

Noted For Himself

The loneliness of the British public is well known in the British Museum, according to the superintendent of the Reading Room, Mr. Stinson, who said that the British statesman is a very rare occurrence to lose a book.

American automobiles are rapidly replacing buses in Iceland.

A single-cylinder automobile made in Germany has a motor at the back.

Pioneering In the Peace River Country

Offers Less Hardships Than Suffered By First Prairie Settlers

The Peace River country, as anyone who has visited it, knows, is hardly to be regarded as a pioneering country at all. The first thing that strikes the visitor, and the impression that strengthens wherever he travels in the whole Peace River country, is that this is not a new but a finished agricultural section. He is impressed immediately by the substantial farm homes and buildings, by the well-built rural schools, hospitals and churches, by the fact that the telephone wires have been carried everywhere, and that the ordinary amenities of rural life have been provided in a remarkably short time.

The Peace River country has gone quite as far in these directions as have most of the older settled sections of the West. The roads are good, substantial bridges have been built, everything in fact has been done in a very few years that could be done for an agricultural community ordinarily in 50 years.

Pioneering in the Peace River country does not begin to compare in hardship or difficulties with the pioneering of the early days, when men came to Ontario or Quebec, or the Maritime Provinces. It is attended with less hardship than was suffered by the first settlers on the Prairies—Winnipeg Tribune.

This May Be 1933

No One Is Really Sure What Year We Are Living In

It is generally assumed that we are living in the year 1929, but the year may really be 1933, or even later.

This fact is indicated by a record of eclipses of the sun, which history says that Christ was born during the reign of Herod the Great. But Herod died in the spring of 4 B.C., the exact date being fixed by a lunar eclipse which took place the night before his death.

Obviously, therefore, Jesus might have been born not later than 4 B.C., and possibly earlier.

The church has no definite knowledge of the date of Christ's birth. It fixed the year, month and day of the month arbitrarily.

Astronomers are able to calculate the dates of past eclipses as accurately as those of the future, and so have determined the very day and hour of the eclipse that ushered Herod the Great out of this life.

Nature's Speed Artist

Insect Size Of Bee Travels 815 Miles Per Hour

The fastest known bird is the sparrow-hawk, which reaches the speed of 220 miles an hour over the mountains of Asia, and the fastest fish, the sailfin mackerel, can cover 80 miles in an hour; and the Indian cheetah, the speediest animal on leg, can travel with 60 miles per hour. Man has beaten all these records; but he is still second to an insect, a fly or a bee, which has been recorded to do 815 miles per hour.

Cargo Of No. 1 Hard Wheat

What is believed to be the first full and exclusive cargo of No. 1 hard wheat ever taken out of the twin ports of Port Arthur and Fort William was loaded from Saskatchewan port terminal No. 7 into a tow barge on Saturday, October 12. It consisted of 265,000 bushels destined to Erie, Pa.

Use Gopher Pells

Gopher rod ranching may be the next development in Alberta. The Lethbridge Herald reports that an eastern firm is endeavoring to secure a large number of gopher pells for experimental purposes in the fur trade, and a communication to that effect has been received by the Board of Trade.

A Long Lived Horse

A horse 31 years old was recently exhibited in Germany. It is said that this horse has done all the work on a 16-acre farm and made a daily trip of 18 miles with a light wagon since three years of age.

Her Idea Of The Navy

Old lady (meeting sailor on country road): "But, do ye know my son, Jack, in the navy?"

Sailor: "Which ship is he serving in?"

Old lady: "What? Be there two?"

Canadian Wheat For India

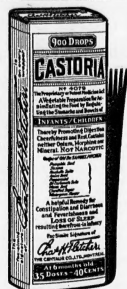

The full cargo of Canadian wheat ever carried direct to India left the Port of Montreal on Tuesday, October 8, being 252,688 bushels bound for Calcutta.

A single-cylinder automobile made in Germany has a motor at the back.

When Babies Are upset

Baby ill and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea—a condition it is always important to check quickly. How would you say this emergency—tonight? Have you a bottle of Castoria ready? There is nothing that can take the place of this harmless but effective remedy for children; nothing that acts quite the same, or has like the same comforting effect on them.

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparer.

Castoria always on hand. But don't keep it just for emergencies; let it be an old friend. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help a colicky child whose tongue is coated because of sluggish bowels. All druggists have Castoria, the genuine bears Chas. H. Fletcher's signature on the wrapper.

New Scheme To Aid Settlers

"British Family Reunion Association" Has Many Frontiers Members

With the object of giving a powerful stimulus to the immigration to Canada of British colonists who can be satisfactorily settled, an entirely new organization has been created by the Department of Colonization and Development, Canadian Pacific Railway.

The name of the new body is "The British Family Reunion Association," an activity which is being carried out throughout the Dominion, and it is understood that the forces of the Canadian Pacific, the Hudson's Bay Company, many other organizations and influential Canadians will be joined in this effort to supply new emigrants.

The heads of British families in Canada, while earning enough to properly support their families here, are unable, within a brief period, to have sufficient money to bring their families to Canada, due to the fact that they have had to support themselves here and their families in Great Britain at the same time, will be assisted. Then there are families who have become comfortably established in Canada and who desire to help relatives and friends in Great Britain to avail themselves of the opportunities which Canada has to offer, not only for the sake of the latter, but also for their children. The new association is designed to assist in the fulfillment of the wishes of the one and the ambitions of the other.

Stratford Players Coming

Famous Festival Company In Again Appearing In Western Canada

Regina—For an engagement of three nights, beginning on Monday, Nov. 11th, the famous Stratford-Upstart Festival Company, from the Memorial Theatre at Stratford-upon-Avon, will appear at the Grand Theatre, Regina, presenting in the evening, "Much Ado About Nothing," "Romeo and Juliet," "Julius Caesar," and "Twelfth Night."

The splendid artistic qualities of this organization are well known to players through the appearance of the company here last season, when an entirely different repertoire was presented. The plays on the present list are those that were revived at the Memorial Theatre last summer. The company is almost the same as last season, with only such changes in personnel as have been necessitated by the altered number of players. The players are: George Hayes, Wilfrid Gordon, Roy Byford, Eric Maxon, Gordon Bailey, William Calvert, Oliver Crombie, Kenneth Wicketts, Robert Hare, H. R. Lee, Jack Elgish, Geoffrey Wilkinson, C. Rivers, Gladys Noel, John Joyce, Ethel, Fable Drake, Mary Hobbs, Oliver Warr, Miriam Adams, Dorothy Francis and Maud Clark. Monday evening, "Much Ado About Nothing"; Tuesday evening, "Romeo and Juliet"; Wednesday evening, "Julius Caesar"; Wednesday evening, "Twelfth Night."

Just Right For Upset Stomach

For after-eating distress, gas, sourness and bloating, the quick and positive neutralizing action of Bisquick Biscuits has proved to be just right. Baked, crisp and gratifying, cooked instantly like the very first home-baked, few cents worth obtainable from any good druggist, lasts for a long time.

An Early Tractor

Thirty years ago, on September 6, 1899, a steam tractor was demonstrated near Morris, Man. This outfit, travelling at about 14 miles per hour, was a fine piece of machinery, cutting a twelve foot swath to a depth of four inches. A roller was attached behind the ploughs, and it was claimed that a perfect road was created from raw prairie without back-setting.

Count Ferdinand von Zeppelin, noted inventor of dirigibles, was an officer in the balloon corps of an United States Army during the Civil War.

New Bridge For Vancouver

Increasing traffic, both freight and passenger, in the vicinity of Vancouver, has decided the British Columbia government to construct a new bridge across the north arm of the Fraser River from Vancouver, to be ready by the spring of 1930. It will be 130 feet in length.

Both the Mediterranean and the Gulf Stream which flows like an individual sea in the Atlantic, are very warm and of a deep and beautiful blue in color.

the period of training has been
considerably lengthened. When
the medical graduate is given
a license to practice, he or she
is qualified to render certain
definite services because of the
knowledge acquired.

Your doctor knows the struc-
ture of the human body; and
how it functions when it is nor-
mal or in a state of health. Those
who think of their doctor
as one to call when there is
illness in the home, forget that
he knows about the well per-
son. It is because of his knowl-
edge of the normal body; and
how it can be kept normal, that
he is able to provide a service
to humanity in keeping people
well. It is for this reason that
the periodic health examination
of apparently well persons by
the family physician is of great
value. It is through such ex-
aminations that the doctor is
able to give to his health clients
the benefit of what he knows
concerning the maintenance of
health and the prevention of
disease, consequently the se-
curing of more years of health.

Your doctor knows the early
signs or symptoms of disease,
just as he knows what occurs
in acute diseases. He knows
how to treat disease early in
order to prevent the develop-
ment of more serious condi-
tions. He knows what the
man or woman with weakened
organs should and should not
do. He knows all this, but un-
less he is given the chance to
use his knowledge in the early
stages of disease, he cannot
help you.

Because of what your doctor
knows, you should make full
use of your knowledge to help
you in keeping, in the early

sonally by letter.

Dept. of Agriculture Offers Official Statement On Chemical Weed Killers

At a meeting of the Alberta
Advisory Weed Board, held in
Edmonton recently, a number
of amendments in existing
weed legislation were consid-
ered and will be passed on to the
Government for recommenda-
tions from the Board.

The following resolution was

passed by Chemical Weed Kil-
lers which have been placed on
the market. An exhaustive
series of experiments have been
conducted and it was after
hearing the report on these
experiments that the resolution as embodied
below, was adopted:

"BE IT RESOLVED THAT we
as members of the Alberta Ad-
visory Weed Board, after re-
viewing the series of experi-
ments conducted during the
past season by the Department
of Agriculture, go on record as
being of the opinion that cer-
tain chemicals which are now
on the market in this province
have a definite value as a con-
trol measure in checking the
spread of noxious weeds.
We are further of the opinion
that, so far as can be deter-

ed by these experiments, those
chemicals which contain chlo-
rines as the active principle are
more effective than those of
which the active principle is
one of the sulphates, nitrates
or chlorides. We feel that the
use of Chemicals containing
chlorines can be recommended
as a control measure on patch-
es of perennial weeds where
cultivation is difficult, or on
patches found on ditch banks,
around lakes or road allowan-
ces, and in general on waste
places where cultivation is im-
possible.

We are of the opinion that
where thorough cultivation can
be carried out the use of chemi-
cal weed de-royer is more ex-
pensive and less effective."

However, before the Dept.
pronounces definitely on this
matter, they will await further
experiments by the National
Research Council, who are now
negotiating with the various
Agricultural Experimental Sta-
tions with a view to arranging
a set of comprehensive experi-
ments at the various stations
throughout Canada.
